PROFILE

Computer Science graduate driven to build software that is practical, reliable, and easy for users to work with. Hands-on experience across full-stack web development, applied machine learning and computer vision, Java desktop applications, and Android development. Enjoys solving problems, thinking creatively, and learning by doing. Seeking a software engineering role to contribute to real-world projects, work closely with a team, and keep growing technical and professional skills.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering 2026
CMR Institute of Technology, Bangalore | CGPA: 8.02

12th Grade (PCMC) 2022
St Joseph's Indian Composite PU College, Bangalore | 87.66%

10th Grade 2020
Sri Kumaran's English School, Bangalore | 94.08%

TECHNICAL SKILLS

Programming Languages: Python, Java, C
Web Technologies: HTML, CSS, JavaScript, Flask
Database: MySQL, SQLite, SQL
CS Concepts: Data Structures & Algorithms, OOP, DBMS, OS
Cloud & DevOps: Docker, Git, GitHub Actions (CI/CD), GCP
Software & AI: Linux, Windows, Visual Studio Code, Power BI, LLMs, Prompt Engineering

PROFESSIONAL EXPERIENCE

Android App Development Intern (Generative AI) 4 Months
MindMatrix

- Developed the **Arogya Sahaya** smart healthcare application using Kotlin, XML, and Room Database.
- Implemented medicine management, reminder notifications, vital health data tracking, health trend visualization, and emergency SOS functionality.
- Leveraged Generative AI tools to accelerate code generation, debugging, and overall application development.
- Designed, developed, tested, and integrated all modules to deliver a complete end-to-end healthcare solution.

PROJECTS

EcoScrap — Smart Scrap Collection Platform

Tech Stack: Flask, Python, HTML5, CSS3, JavaScript, MySQL, SQLAlchemy, REST API

- Built a web-based platform connecting users with doorstep scrap collection services for plastic, paper, metal, glass, and e-waste.
- Enabled users to browse accepted waste categories and schedule pickups with contact details, address, and preferred time slot.
- Developed an admin module to manage pickup requests, assign collection vehicles, update scrap rates, and monitor collection; users receive payment based on quantity and type of scrap submitted.

Intelligent Job Interview Prediction

Tech Stack: Python, Scikit-learn, OpenFace, OpenCV, Flask, SQLite, Ollama + Gemma-2B

- Developed an AI-based interview evaluation system that analyzes facial expressions and non-verbal behavior from live or recorded interview videos using computer vision.
- Extracted facial Action Units and mapped them to OCEAN personality traits using Fuzzy AHP to generate an objective Hire-Likert score for unbiased candidate assessment.
- Delivered explainable AI-based feedback and detailed performance reports to support intelligent recruitment decisions.

Hotel Property Management System (PMS)

Tech Stack: Java, JavaFX, FXML, CSS, Maven, JDBC, MySQL

- Developed a JavaFX application to manage room inventory, guests, reservations, check-in/check-out, housekeeping, and hotel services, with secure role-based login.
- Implemented room availability validation, booking-conflict prevention, and business rules for guest capacity and room status.
- Followed a layered architecture (Controllers, Service classes, DAO classes, JDBC, MySQL) with a dynamic dashboard and operational reports.

CERTIFICATIONS

Python — Complete Developer Course (Udemy) | Java Programming (Udemy) | SQL — Complete Bootcamp (Udemy)

ADDITIONAL INFORMATION

Leadership: Student Ambassador, CMR Institute of Technology
Activities: Participated in Flash Mob at College Fest; active badminton and carrom player
Languages: English, Kannada, Telugu, Tamil, Hindi
Interests: Watching movies, playing carrom, dancing
